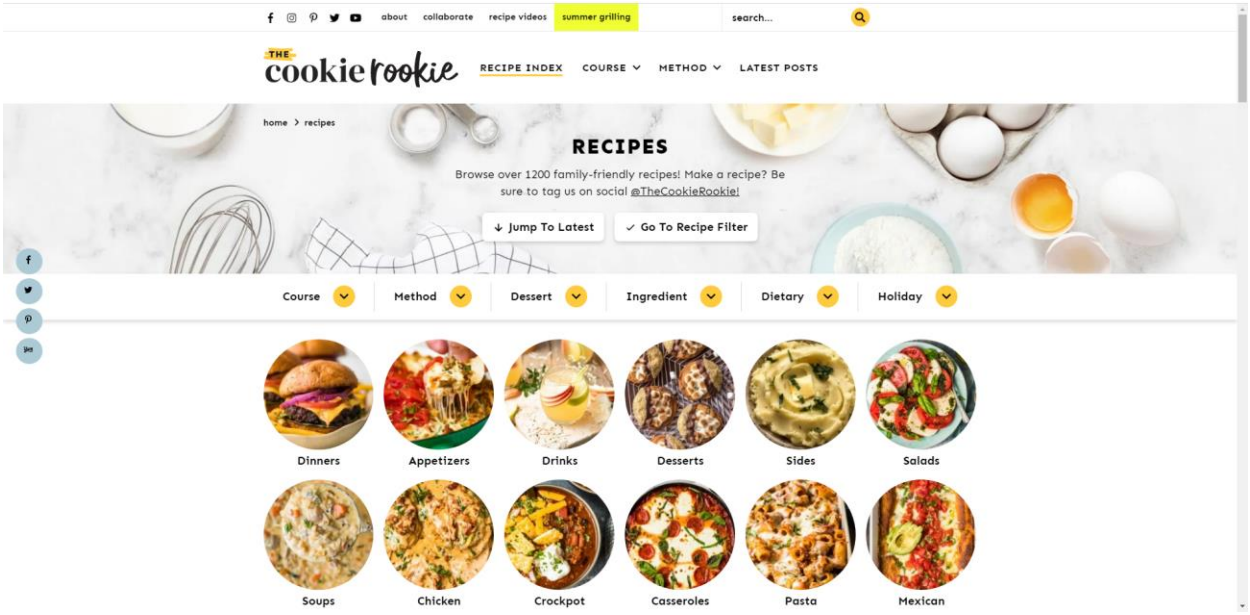
Task 2.5

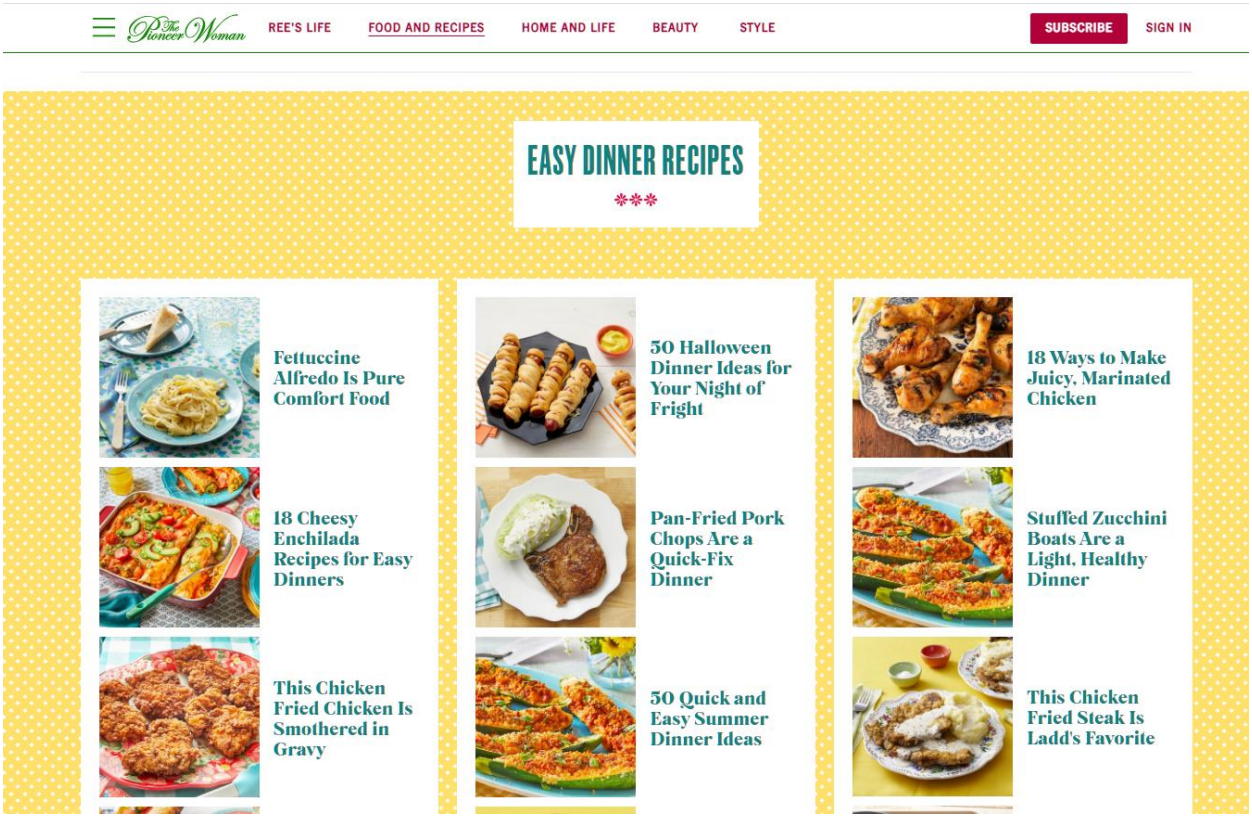
Model adjustments: Adding pics, description.

Inspiration from existing recipe apps:

The Cookie Rookie – I like the rounded-off tiling of the images, and the background for the “recipes portion is well styled – clean, but not overly so.



The Pioneer Woman – folksy and intentionally so. Again, the tiling is good, I think, giving the user an idea of what kind of food/recipes/etc. they may be in for.



Bon Appetit – I wanted to include one that I didn't like as much because I think that often can tell us things about directions we do want to take. While I appreciate the use of negative space, the more sophisticated and clean look to this one, the images are too large and leave far too much white space, leaving the user with less of an idea of the potential content.
